### DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, 37-59, and 67-80, drawn to a system for the manipulation of a relationship management system, classified in class 707, subclass 101.
- II. Claims 18-26, 60-66, and 81-84, drawn to a system for generating a database for storing contact information for each of a plurality of contacts, classified in class 707, subclass 102.
- III. Claims 27-36, drawn to a method for processing a data structure used by multiple users, classified in class 707, subclass 103Y.

Inventions I, II, III are related as combination and subcombinations.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particular subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination (I) as claimed does not require the subcombinations II or III, as claimed because it is a system for the manipulation of a relationship management system, which does not need to be related to the claimed system for generating a database for storing contact information for each of a plurality of contacts nor a method for processing a data structure used by multiple users. The subcombination II, as claimed does not require the combination I or subcombination III,

Art Unit: 2161

as claimed because the system for generating a database for storing contact information for each of a plurality of contacts does not need a system for the manipulation of a relationship management system nor a method for processing a data structure used by multiple users. The subcombination III, as claimed does not require the combination I or subcombination II, as claimed because a method for processing a data structure used by multiple users does not need the system for generating a database for storing contact information for each of a plurality of contacts nor a system for the manipulation of a relationship management system. Therefore, the inventions are distinct; however, they could be usable together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for I is not required for II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Roger Hepperman (312) 474-6605 on April 10, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2161

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement traversed (37 CFR 1.143).

This office action sets a one-month period for reply (restriction requirement), the applicant may obtain a two-month extension of time under 37 CFR 1.136(a) before being subject to a reduction of patent term adjustment under 154(b)(2)(C)(ii) and CFR 1.704(b).
